Circle Maze Rewind Challenge

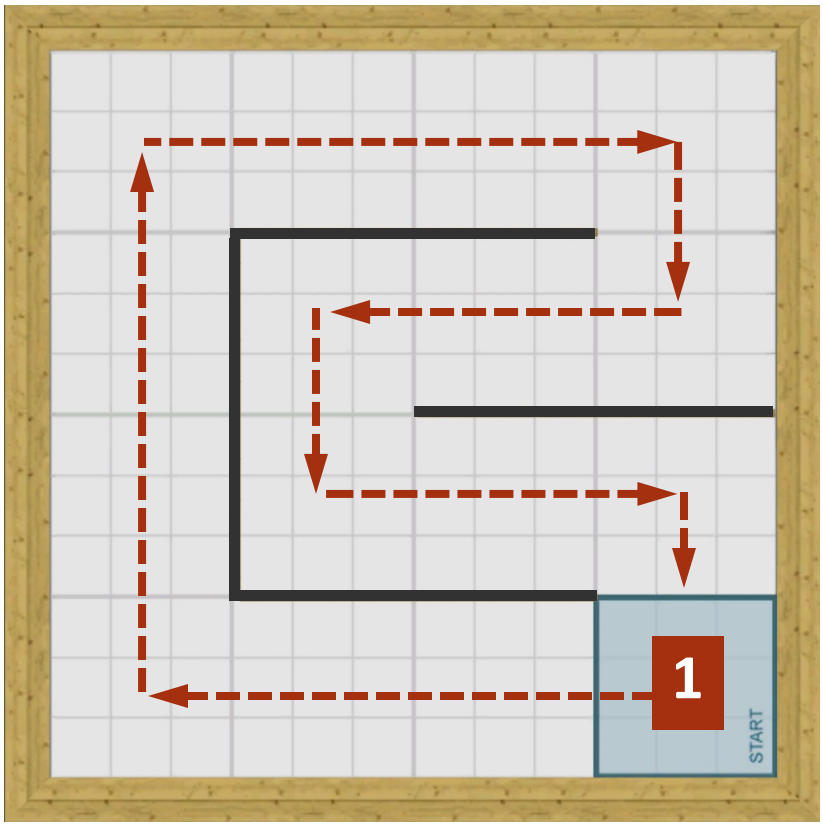
Challenge Description

This challenge features a sequence of turns that the robot must perform in order to travel through the maze twice. The robot must first begin at the starting point and get to the goal area by completing turn and forward movement behaviors. The robot must travel the path specified below. The robot must NOT cross any lines.

Materials Needed

- Black electrical tape
- Ruler (or straight edge)
- Scissors (or cutting tool)

Board Specifications



1 Robot must begin here and travel counter-clockwise through the maze area without crossing any black lines
