
		VEX CORTEX Classroom Bundles		
		Super Bundle	Programming Bundle	Starter Bundle
		Complete classroom teaching solution including all programming and mechanical options. This bundle includes all of the VEX parts required to teach the Carnegie Mellon ROBOTC VEX Curriculum. If you can afford it, this is the bundle that you want to purchase.	Introductory classroom teaching solution for teachers interested in teaching programming, but can't afford to purchase all of the sensors. This hardware includes all of the sensors you will need to use the Teaching ROBOTC for IFI training materials.	Barebones introduction to the VEX robotics platform. The bundle includes a Protobot kit, microcontroller, VEXnet hardware, and rechargeable batteries with a charger.
