

Algorithm

An ordered set of operations used to solve a problem

Checkpoint

A stopping point in a project. Certain criteria need to be met before proceeding past this point and on with the project.

Functional Prototype

A prototype that displays both the intended function and appearance of the project design

Proof of Concept

A rough prototype, sometimes incomplete, used to demonstrate a function and prove the feasibility of a design

Pseudocode

A structured outline of a program written in plain language. It must be in sequential order and include enough detail to make it clear what the intent of the program is.

Request for Proposal (RFP)

A document that is used by a company or organization to announce that funding is available for a particular project or program. The intention is for companies to place bids and create plans to complete the project.

Solution Strategy

An ordered plan that will be used to solve a problem
